From the Director

The MBL has had a remarkable influence on my career. The summer of 2019 was my eighteenth year in Woods Hole, and it has become a place that I cherish. As I transition from a seasonal faculty member and begin my tenure as Director, I am excited to build upon the MBL's extraordinary history and elevate it to even greater prominence.

Informed by strategic planning launched by prior leadership, the MBL is embarking on a path to achieve sustained success and new growth and expansion over the next five years. The strategic plan focuses on four key programming and organizational objectives including expanding the resident and the visiting scientist research programs, creating new educational offerings, including opportunities for undergraduates and high school students, and increasing the use of our conference facilities. While each initiative on its own will benefit the MBL, the full potential will only be realized if all of them are adequately aligned and resourced properly through philanthropy and grant support.

To achieve our goals in these key areas we must continue to make advancements in two major strategic research areas—imaging and new research organisms. We've made great progress on both of these fronts thanks to funders like the Chan Zuckerberg Initiative and their support of our Imaging Initiative, the Promega Corporation and their commitment to education, and the Millicent and Eugene Bell Foundation, who, with the Massachusetts Cultural Council, is enabling a broader array of public programming at the MBL through the renovation of the Lillie Auditorium.

I am tremendously grateful to all of our funders and to our faculty, staff, and trustees for their contributions and support. It's an exciting and promising time for the MBL and I look forward leading the laboratory as we begin a new chapter of biological discovery.

Sincerely,

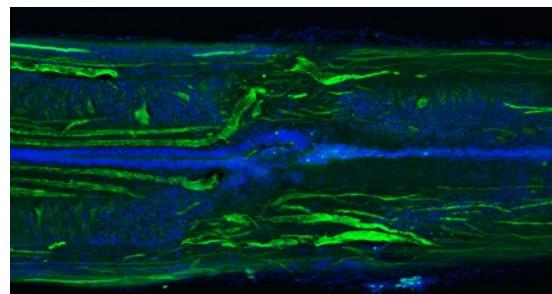

Nipam H. Patel
Director, Marine Biological Laboratory

Highlights

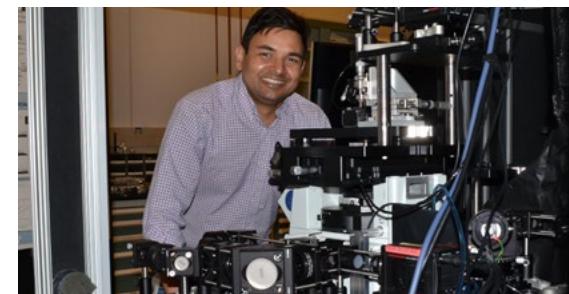

Pygmy Zebra Octopus is Bred through Multiple Generations for First Time

Marking a world first, the MBL Cephalopod Program succeeded in culturing the pygmy zebra octopus (*Octopus chierchiae*) through multiple generations in the Marine Resources Center. Breeding selected species of octopus, squid, and cuttlefish is a challenging yet essential part of the Cephalopod Program's mission to develop genetically tractable laboratory research organisms from this class of marine invertebrates. Cephalopods, which have been studied at the MBL for more than a century, provide fundamental insights in broad areas of research including neuroscience, evolutionary and developmental biology, sensory biology, and RNA editing, with potential applications in medicine, materials science, robotics and bio-inspired design.

The Lamprey Regenerates its Spinal Cord Not Just Once — but Twice

Spontaneous recovery from spinal cord injury is almost unheard of in humans and other mammals, but many vertebrates fare better. The eel-like lamprey, for instance, can fully regenerate its spinal cord after it's been severed and resume swimming and other functions within 12 weeks. In a new study, MBL scientist Jennifer Morgan and colleagues discovered that lampreys can regenerate just as impressively after a second complete spinal cord injury at the same location. The study opens up a new path for identifying pro-regenerative molecules and potential therapeutic targets for human spinal cord injury. Morgan is director of the MBL's Eugene Bell Center for Regenerative Biology and Tissue Engineering. PLOS ONE, DOI: 10.1371/journal.pone.0104193

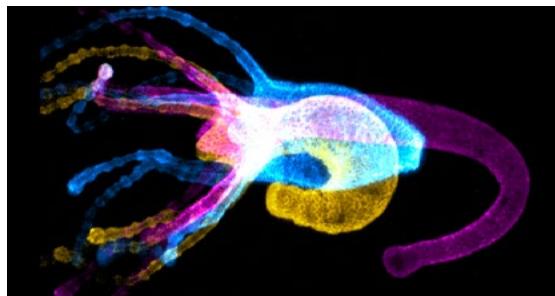

MBL Receives Chan Zuckerberg Award to Fund Imaging Scientist

Microscopy innovator Abhishek Kumar received an award from the Chan Zuckerberg Initiative to join the MBL's scientific staff as a key collaborator in the MBL Imaging Initiative, an emerging, interdisciplinary center dedicated to research, discovery, and training in biological imaging and analysis. Hundreds of scientists, students, and industry experts convene at the MBL each year for research at the interface of biology, microscopy instrument development, and computational image analysis. The Imaging Initiative supports and synergizes this community toward several goals: developing new microscopes to address a diversity of biological problems; improving image analysis speed and capabilities; and providing user-friendly imaging technologies and solutions so a wide range of students and scientists can adopt them for their research.

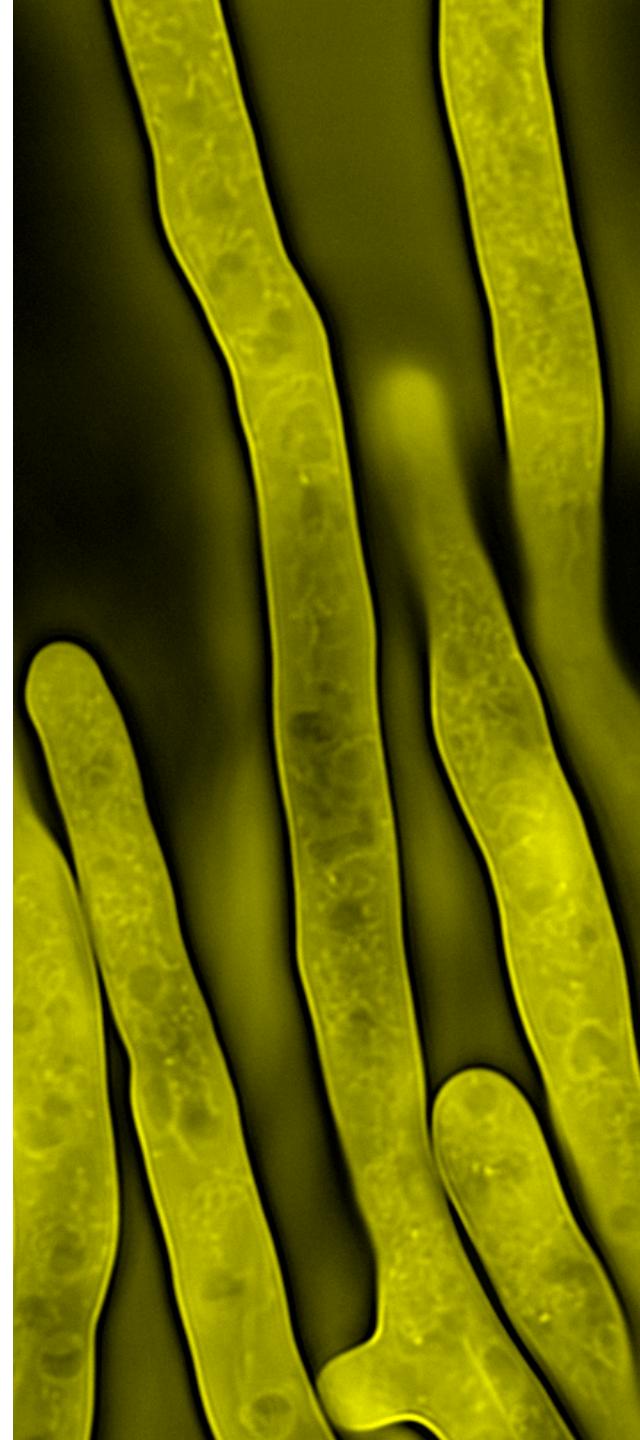

Scientists Identify Gene Partnerships that Promote Spinal Cord Regeneration

MBL researchers are one step closer to solving the mystery of why humans create scar tissue after spinal cord injury, leading to lifelong damage, while some animals can fully regenerate the spinal cord and recover function. MBL scientist Karen Echeverri and colleagues identified gene “partners” in the axolotl salamander that, when activated, allow the neural tube and associated nerve fibers to functionally regenerate after severe spinal cord damage. Interestingly, these genes are also present in humans, although they are activated in a different manner. “It doesn’t appear so far that axolotls have regeneration-specific genes,” said Echeverri. “It’s all about how these genes partner with other genes directly after injury, and how that partnership drives the organism either toward regeneration or forming scar tissue.” *Nature CommBiology*, DOI: 10.1038/s42003-019-0335-4

Muscle Activity Map in Hydra Illuminates How Nervous System Creates Behavior

For the first time known, a team led by MBL Whitman Scientist Rafael Yuste mapped the full-body muscular activity of an animal while it was moving and behaving. The study, which built on the team’s prior success in mapping full-body neural activity in Hydra, pinpointed seven distinct patterns of muscle activity in Hydra and discovered that individual muscle cells can participate in multiple patterns with different kinetics. Their observations add to mounting evidence that the coordinated activity of many cells working together — in this case, across an entire organism — generates new functional and behavioral properties that are not present in single cells. It also brings the group closer to “breaking the neural code” and understanding the relationship between a stimulus and its neural response. Yuste, from Columbia University, has led the MBL Hydra Lab each summer since 2017. *Current Biology*, DOI: 10.1016/j.cub.2019.05.012

Leaving Microbes out of Climate Change Dialogue has Major Consequences

More than 30 microbiologists from nine countries published a warning to humanity that omitting microbes – the support system of the biosphere – from the climate change equation will have major negative consequences. Their Consensus Statement “looks to place microbes at the center of the world stage in terms of importance to climate change biology,” the scientists wrote. “We must learn not just how microbes impact climate change (e.g. production and consumption of greenhouse gases), but also how microbes will be impacted by climate change and other human activities.” The statement’s authors included MBL Director of Research David Mark Welch. MBL scientists are world leaders in microbial ecology, having co-directed the International Census of Marine Microbes, played instrumental roles in the NIH’s Human Microbiome Project, and currently co-direct the Census of Deep Life, which is exploring microbes beneath the ocean floor. *Nature Reviews Microbiol.*, DOI: 10.1038/s41579-019-0222-5

Linda Hyman Tapped to Lead MBL Education Division

Linda E. Hyman, associate provost at Boston University School of Medicine, was named the new Burroughs Wellcome Director of Education at the MBL. Hyman brings more than 25 years of experience to the position, which oversees direction of all the MBL’s academic programs, including the world-renown Advanced Research Training courses. She will lead the expansion of MBL offerings at all levels, from secondary students to undergraduates, graduates and post-graduates, capitalizing on the facilities and resources of the MBL and leveraging the MBL’s relationship with the University of Chicago. At Boston University Medical School, Hyman led the Division of Graduate Medical Sciences (GMS), which oversees all graduate students and postdoctoral trainees. An accomplished and active scientist with expertise in molecular genetics, Hyman was also a Professor of Microbiology at GMS.

Prince Albert II of Monaco Visits MBL

HSH Prince Albert II of Monaco spent a day visiting the MBL, where he demonstrated his strong commitment to marine science, exploration and protection. His Serene Highness sailed on the MBL's collection vessel, the Gemma; viewed marine species in the Marine Resources Center; attended a panel discussion on adapting to climate change; viewed original volumes from the MBLWHOI Library documenting the scientific discoveries of Prince Albert I, a pioneering oceanographer; and received a comprehensive overview of the MBL's marine and environmental research. He also announced a commitment from the Prince Albert II of Monaco Foundation to funding SeaBase at MBL, an open-access infrastructure for integrated data on marine organisms and their habitats for the purpose of understanding and protecting marine biodiversity and ecosystems.

In New MBL Course, High-School Students Envision a Future in Science

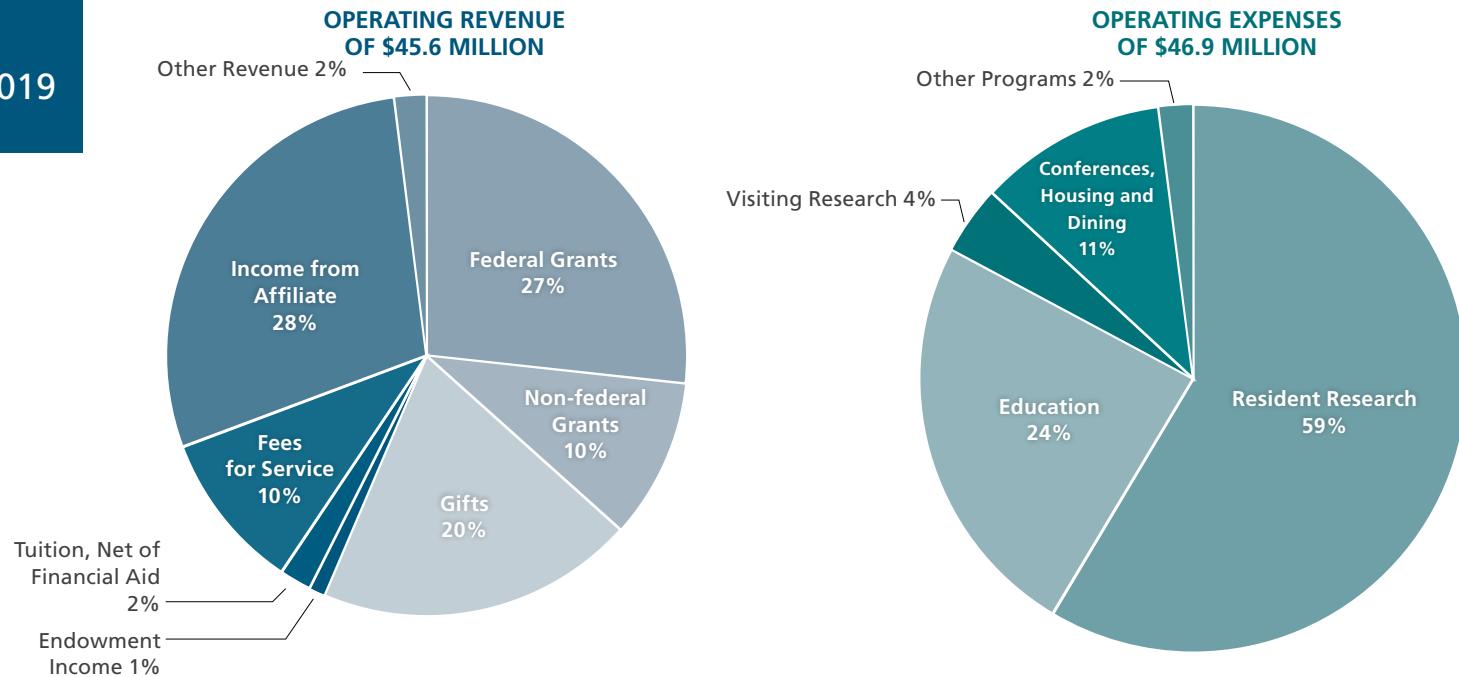

In partnership with the University of Chicago, the MBL launched the High-School Science Discovery Program, week-long courses that train students to undertake biological and ecological research using cutting-edge techniques usually reserved for college or graduate students. Developed in consultation with high-school teachers to meet curriculum requirements, the program introduces students to important trends and approaches in scientific research. The students collected marine specimens in Woods Hole and sequenced their genetic information; learned CRISPR-Cas9 gene editing techniques; imaged specimens on confocal microscopes and constructed 3D imaging datasets; and collected water samples from local salt marshes to evaluate their nitrogen levels. In addition to hands-on research training, the program is designed to give students, at a critical time in their decision-making, the opportunity to discover the many possible pathways to a career in science.

Jerry Melillo, Ecosystems Center
Jennifer Morgan, Bell Center
Hilary Morrison, Bay Paul Center
Rudolf Oldenbourg, Bell Center
B. Duygu Özpolat, Bell Center
Edward Rastetter, Ecosystems Center
Loretta Roberson, Bell Center
Joshua Rosenthal, Bell Center
S. Emil Ruff, Ecosystems Center
Michael Shribak, Bay Paul Center
Mitchell Sogin, Bay Paul Center
Jianwu (Jim) Tang, Ecosystems Center
Maki Tani, Bell Center
Tomomi Tani, Bell Center
Joseph Vallino, Ecosystems Center

WHITMAN CENTER SCIENTISTS SUMMER 2018

Jose Andrade Lopez, Stanford University
Peter Armstrong, University of California
Michael Bennett, Albert Einstein College of Medicine
Scott Brady, University of Illinois at Chicago
Joseph Buxbaum, Mount Sinai
Fred Chang, University of California, San Francisco
Sean Colin, Roger Williams University

Jack Costello, Providence College
Joseph DeGiorgis, Providence College
Catherine Dulac, Harvard University
Jens Fritzenwanker, Georgetown University
David Gadsby, Rockefeller University
Daniel Gibson, Worcester Polytechnic Institute (Ret.)
J. Andrew Gillis, University of Cambridge
Robert Goldman, Northwestern University, Feinberg School of Medicine
Gohta Goshima, Nagoya University
Jessica Gray, Harvard Medical School
William Green, University of Chicago
Valentin Gribkoff, Yale University School of Medicine
J. Marie Hardwick, Johns Hopkins University
Avram Hershko, Technion Faculty of Medicine
Miguel Holmgren, National Institute of Neurological Disorders and Stroke/National Institutes of Health
William Jeffery, University of Maryland
Daniel Johnston, University of Texas at Austin
Elizabeth Jonas, Yale University School of Medicine
Erik Jorgensen, University of Utah
Leonard Kaczmarek, Yale University School of Medicine
U. Benjamin Kaupp, Center of Advanced European Studies and Research
Kamran Khodakhah, Albert Einstein College of Medicine
Hans Laufer, University of Connecticut
Rodolfo Llinás, NYU School of Medicine
Chris Lowe, Stanford University
Jocelyn Malamy, University of Chicago
Robert Malchow, University of Illinois at Chicago
Veronica Martinez-Acosta, University of the Incarnate Word
Karl Matlin, University of Chicago
Allen Mensinger, University of Minnesota, Duluth
Gerardo Morfini, University of Illinois at Chicago
Tetsuya Nakamura, Rutgers University
Harish C. Pant, National Institute of Neurological Disorders and Stroke/National Institutes of Health
Ryan Range, Auburn University
Tom Reese, National Institutes of Health
Heather Rhodes, Denison University
Antonina Roll-Mecak, National Institutes of Health
William Ross, New York Medical College

Reinhard Seifert, Center of Advanced European Studies and Research
Neil Shubin, University of Chicago
Roger Sloboda, Dartmouth College
Joel Smith, Mizar Imaging
Sid Tamm, Marine Biological Laboratory
Mark Terasaki, University of Connecticut Health Center
Eric Tytell, Tufts University
Clare Waterman, National Heart, Lung, and Blood Institute/National Institutes of Health
Joshua Zimmerberg, National Institutes of Health
Steven Zottoli, Williams College

WHITMAN CENTER FELLOWS

SUMMER 2018

Kambiz Alavian, Imperial College London
Tobias Baskin, University of Massachusetts, Amherst
C. Titus Brown, University of California, Davis
Lionel Christiaen, New York University
Karen Crawford, St. Mary's College of Maryland
Scott Dawson, University of California, Davis
Patrick Emery, University of Massachusetts Medical School
Ben Evans, McMaster University
Lillian Fritz-Laylin, University of Massachusetts, Amherst
David Furlow, University of California, Davis
Edgar Gomes, Instituto Medicina Molecular
Jose Gomez-Skarmeta Centro Andaluz de Biología del Desarrollo
Pierre Gönczy, Swiss Federal Institute of Technology Lausanne
Paloma Gonzalez Bellido, University of Cambridge
Jeffrey Gross, University of Pittsburgh School of Medicine
Liam Holt, New York University
Hooi Lynn Kee, Stetson University
Maryna Lesoway, University of Illinois at Urbana-Champaign
G.W. Gant Luxton, University of Minnesota
Paul Maddox, University of North Carolina at Chapel Hill
Tetsuya Nakamura, Rutgers University
Andrea Pauli, Institute of Molecular Pathology
Christopher Sansam, Oklahoma Medical Research Foundation

Janet Sheung, Vassar College
 Victoria Sleight, University of Cambridge
 Denisa Wagner, Boston Children's Hospital
 Shigeki Watanabe, Johns Hopkins University
 Rafael Yuste, Columbia University

MBL FELLOWS

Daniel Colón-Ramos, Yale University School of Medicine
 Amy Gladfelter, University of North Carolina at Chapel Hill
 Amy Herbert, Stanford University
 Robert Howarth, Cornell University
 Emilio Kropff, Fundacion Instituto Leloir
 Patrick La Rivière, University of Chicago
 Jane Maienschein, Arizona State University
 Alexandra Schnell, University of Cambridge
 Hari Shroff, National Institutes of Health
 Caroline Vissers, Johns Hopkins University School of Medicine

GRASS FELLOWS SUMMER 2018

Kathryn Feller, University of Cambridge
 Matthew McCoy, Stanford University
 Tessa Montague, Harvard University
 Naoya Takahashi, Humboldt University of Berlin
 Jaime Willett, North Carolina State University
 Junichi Yoshida, Tamagawa University

COURSE DIRECTORS AND FACULTY SUMMER 2018

Carrie Adler, Cornell University
 Yosi Aizen, Ruppin Academic Center, Israel
 Michael Akam, University of Cambridge
 Dirk Albrecht, Worcester Polytechnic Institute
 Raymundo Alfaro-Aco, Princeton University
 Mark Alkema, University of Massachusetts Medical School
 Sharon Amacher, The Ohio State University
 David Andes, University of Wisconsin
 Cecile Ane, University of Wisconsin-Madison
 James Angstadt, Siena College
 Ricardo Araneda, University of Maryland
 Richard Auchus, University of Michigan

Stephen Baccus, Stanford University
 Michael Baltzley, Western Oregon University
 Andrzej Banburski, Massachusetts Institute of Technology
 Scott Barolo, University of Michigan Medical School
 Pouya Bashivan, Massachusetts Institute of Technology
 Diana Bautista, University of California, Berkeley
 Mark Beenhakker, University of Virginia School of Medicine
 Peter Beerli, Florida State University
 Richard Behringer, University of Texas MD Anderson Cancer Center
 Daniel Bernard, McGill University
 Joerg Bewersdorf, Yale University
 Joseph Bielawski, Dalhousie University
 Dawn Blitz, Miami University
 James Boedicker, University of Southern California
 Xavier Boix
 Arpita Bose, Washington University in St. Louis
 Cynthia Bradham, Boston University
 Hans Brecht, Humboldt University Berlin
 Robert Brewster, University of Massachusetts Medical School
 Stephen Brohawn, University of California, Berkeley
 C. Titus Brown, University of California, Davis
 Emery Brown, Massachusetts Institute of Technology
 William Browne, University of Miami
 Clare Buckley, University of Cambridge
 Minh Bui, The Australian National University
 Barbara Burleigh, Harvard School of Public Health
 Ronald Calabrese, Emory College of Arts and Sciences
 Lisa Cameron, Duke University
 Diane Carlisle, University of Pittsburgh
 Mark Carrington, University of Cambridge,
 Department of Biochemistry
 Vern Carruthers, University of Michigan
 Fernando Casares, CABD (Centro Andaluz de Biología del Desarrollo)
 Edward Castañeda, University of Texas at El Paso
 Flaminia Catteruccia, Harvard T.H. Chan School of Public Health
 Kara Cerveny, Reed College
 Maurice Chacron, McGill University
 Belinda Chang, University of Toronto
 Candice Chavez, Rutgers University

Dmitri Chklovskii
 Ain Chung, New York University
 Griffin Chure, California Institute of Technology
 Claudia Clopath, Imperial College London
 Andres Collazo, California Institute of Technology
 Brendan Cormack, Johns Hopkins University
 Djurdjica Coss, University of California, Riverside
 Kyle Costa, University of Minnesota
 Robert Cramer, Geisel School of Medicine at Dartmouth
 Sean Crosson, University of Chicago
 David Daggett
 Nelly Daur
 Scott Dawson, University of California, Davis
 Richard Day, Indiana University School of Medicine
 Enrique De La Cruz, Yale University
 Jose de la Torre, San Francisco State University
 George Deepe, University of Cincinnati College of Medicine
 Christopher Deiser, Brown University
 Kirk Deitsch, Weill Cornell Medical College
 Francesco Demao, National Institute of Environmental Health Sciences
 Lizanne DeStefano, Georgia Institute of Technology
 Manuel Diaz-Rios, University of Puerto Rico, Medical Sciences Campus
 James DiCarlo, Massachusetts Institute of Technology
 Michelle Digman, University of California, Irvine
 Ina Dobrinski, University of Calgary
 Adam Douglass, University of Utah
 Francesca Duncan, Northwestern University
 Casey Dunn, Yale University
 Charles Easley, University of Georgia
 Uri Eden, Boston University
 John Edwards, Harbor-UCLA Medical Center
 Scott Edwards, Harvard University
 Buffy Ellsworth, Southern Illinois University
 Laura Eme, Uppsala University
 Bard Ermentrout, University of Pittsburgh
 Douglas Erwin, Smithsonian Institution
 Anne Etgen, Albert Einstein College of Medicine
 James Fadool, Florida State University
 Adrienne Fairhall, University of Washington
 Steven Farber, Carnegie Institution for Science
 Michale Fee, Massachusetts Institute of Technology

Lisa Fenk
Andre Fenton, New York University
Aretha Fiebig, Michigan State University
Ilia Fiete, Massachusetts Institute of Technology
Robert Fischer, National Heart, Lung, and Blood Institute/National Institutes of Health
Yvette Fisher, Harvard Medical School
Rafael Fissore, University of Massachusetts, Amherst
James Fitzgerald, Howard Hughes Medical Institute-Janelia Research Campus
Daniel Fletcher, University of California, Berkeley
David Forsthoefel, Oklahoma Medical Research Foundation
Eric Fortune, New Jersey Institute of Technology
Loren Frank, University of California, San Francisco; Howard Hughes Medical Institute
Stefano Fusi, Columbia University
Gregory Gage, Backyard Brains
Hernan Garcia, University of California, Berkeley
Jennifer Garrison, Buck Institute
Maria Geffen, University of Pennsylvania
Antonio Giraldez, Yale
Daniel Goldman, Georgia Tech
Mark Goldman
Bob Goldstein, University of North Carolina at Chapel Hill
Butch Granada, Hamamatsu
Michael Granato, University of Pennsylvania
Stephan Grill, Max Planck Institute of Molecular Cell Biology and Genetics
Marc Hammarlund, Yale University
Stephen Hammes, University of Rochester
Shuting Han, Columbia University
Kurt Hanselmann, ETH Zürich
Richard Harland, University of California, Berkeley
Kenneth Harris
Josh Hawk, Yale University
James Haxby, Dartmouth College
Tracy Heath, Iowa State University
Joseph Heitman, Duke University
Jonathan Henry, University of Illinois
Michael Higley, Yale University School of Medicine
Veronica Hinman, Carnegie Mellon University
Barry Hinton, University of Virginia
Soichi Hirokawa, California Institute of Technology
Hans Hofmann, The University of Texas at Austin

Volker Hofmann, McGill University
Mark Holder, University of Kansas
Gunther Hollopeter, Cornell University
Susan Holmes, Stanford University
Michael Hoppa, Dartmouth College
David Horn
Corinne Houart, King's College London
John Huelsenbeck, University of California, Berkeley
Curtis Huttenhower, Harvard T.H. Chan School of Public Health
Anna Huttenlocher, University of Wisconsin
Anthony Hyman, Max Planck Institute of Molecular Cell Biology and Genetics
Caitlin A. Inglis
Laurinda Jaffe, University of Connecticut Health Center
Erin Jarvis, University of California, Berkeley
Kevin Jones, University of Michigan
Erik Jorgensen, University of Utah
Joan Jorgensen, University of Wisconsin
Frank Jülicher, Max Planck Institute for the Physics of Complex Systems
Kohitij Kar, Massachusetts Institute of Technology
Boris Kat, Massachusetts Institute of Technology
Raymond Keller, University of Virginia
Sarah Keller, University of Washington, Seattle
Nicole King, University of California, Berkeley; Howard Hughes Medical Institute
Laura Knapik, University of New England
Peter Kner, University of Georgia
Rob Knight, University of California, San Diego
L. Lacey Knowles, University of Michigan
Jane Kondev, Brandeis University
James Konopka, Stony Brook University
Elena Koslover, University of California, San Diego
Edward Kravitz, Harvard Medical School
Gabriel Kreiman, Harvard Medical School
Robb Krumlauf, Stowers Institute for Medical Research
Damian Krysan
Laura Kubatko, The Ohio State University
Patrick La Rivière, University of Chicago
Michael Landis, Yale University
Heun Lee, California Institute of Technology
Jay Lennon, Indiana University
Elena Levashina, Max Planck Institute for Infection Biology

Paul Lewis, University of Connecticut
Jeff Lichtman, Harvard University
Xiaorong Lin, University of Georgia
Jennifer Lippincott-Schwartz
Polina Lishko, University of California, Berkeley
Mary Logan, Oregon Health and Science University
Png Loke, NYU School of Medicine
Alejandro Lomniczi, Oregon National Primate Research Center and Oregon Health and Science University
William Longabaugh,
Ellen Lumpkin, Columbia University
Ian Macara, Vanderbilt University
Amy Maddox, University of North Carolina at Chapel Hill
Paul Maddox, University of North Carolina at Chapel Hill
Gaby Maimon, The Rockefeller University
Carmen Maldonado, University of Puerto Rico, Rio Piedras
Karolina Marciniak, The Rockefeller University
Eve Marder, Brandeis University
Michael Markham, University of Oklahoma
Wallace Marshall
Veronica Martinez-Acosta, University of the Incarnate Word
Alexa Mattheyses, University of Alabama at Birmingham
David Matus, Stony Brook University
Claire Max, University of California, Santa Cruz
David McClay, Duke University
Catherine McCusker, University of Massachusetts, Boston
Emily Jane McTavish
Lisa Mehlmann, UConn Health
Shalin Mehta, Chan Zuckerberg Biohub
Michael Metzen, McGill University
Ethan Meyers
Aaron Mitchell, University of Georgia
Timothy Mitchison, Harvard Medical School
James Monaghan, Northeastern University
Jennifer Morgan, Marine Biological Laboratory
Takeshi Morita, The Rockefeller University
Christian Mueller, Simons Foundation
Martin Mueller, University of Zurich
Dyche Mullins, University of California, San Francisco
Mary Mullins, University of Pennsylvania

Douglas Murphy, Howard Hughes Medical Institute, Janelia Research Campus
 Yoshihisa Nakahata, Max Planck Florida Institute for Neuroscience
 Philip Nelson, University of Pennsylvania
 Lee Niswander, University of Colorado
 Brian Norris, California State University, San Marcos
 Alison North, The Rockefeller University
 Elke Ober, University of Copenhagen
 George O'Toole, Geisel School of Medicine at Dartmouth
 Alexander Paredez, University of Washington, Seattle
 Jay Parrish, University of Washington
 Nipam Patel, University of California, Berkeley
 Perrine Paul-Gilloteaux, The French National Center for Scientific Research (CNRS)
 Patrina Pellett
 Isabelle Peter, California Institute of Technology
 Darcy Peterka, Columbia University
 Margaret Petroff, Michigan State University
 Julie Pfeiffer, University of Texas Southwestern Medical Center
 Rob Phillips, California Institute of Technology
 Jonathan Pillow, Princeton University
 Tatjana Piotrowski, Stowers Institute for Medical Research
 Rebecca Piskorowski, Inserm UMR1266 Institute of Psychiatry and Neuroscience of Paris
 Gina Poe, University of California, Los Angeles
 Tomaso Poggio, Massachusetts Institute of Technology
 Mihai Pop
 Kenneth Poss, Duke University Medical Center
 Jan Pruszak, Paracelsus Medical University
 David Raible
 Jeff Rasmussen
 Ravi Ravindranath, National Institute of Child Health and Human Development
 Hesper Rego, Yale University
 Lawrence Reynolds, North Dakota State University
 Matthew Ronshaugen, University of Manchester
 Ellen Rothenberg, California Institute of Technology
 Labib Rouhana, Wright State University
 Jon Sack, University of California, Davis
 Kirsten Sadler Edepli, New York University Abu Dhabi
 Alvaro Sagasti, University of California, Los Angeles

Wendy Salmon, Whitehead Institute
 Alejandro Sanchez, Stowers Institute
 Thomas Sandmann, Denali Therapeutics
 Gerald Schatten, University of Pittsburgh Medical School
 Alex Schier, University of Basel
 Thomas Schilling, University of California, Irvine
 Richard Schneider, University of California, San Francisco
 Elaine Seaver, University of Florida
 Jagesh Shah, Harvard Medical School
 Sidney Shaw, Indiana University
 Don Sheppard, McGill University
 David Sherwood, Duke University
 Hari Shroff, National Institutes of Health
 Charles Shuster, New Mexico State University
 Calvin Simerly, University of Pittsburgh School of Medicine
 Photini Sinnis, Johns Hopkins School of Public Health
 Carmen Smarandache-Wellmann, University of Cologne
 Kevin Smith
 Kem Sochacki, National Heart, Lung, and Blood Institute/National Institutes of Health
 Sara Solla, Northwestern University
 Lilianna Solnica-Krezel, Washington University School of Medicine
 Haim Sompolinsky, Hebrew University
 Sean Speese, Oregon Health and Science University
 Mansi Srivastava, Harvard University
 Max Staller, Washington University in St. Louis
 Rob Steele, University of California, Irvine
 Paula Stein
 Claudio Stern, University College London
 Andrea Streit, King's College London
 David Swofford, Florida Museum of Natural History
 Justin Taraska, National Institutes of Health
 Tracy Teal
 Julie Theriot, Stanford University
 Krista Todd, Westminster College
 Paul Trainor, Stowers Institute for Medical Research
 Phong Tran, University of Pennsylvania
 Todd Treangen, Rice University
 Nicolas Tritsch, New York University School of Medicine

Paul Turner, Yale University
 John Tuthill, University of Washington
 Matthijs van der Meer, Dartmouth College
 Daniel Wagenaar, California Institute of Technology
 Xiao Jing Wang, New York University
 Tandy Warnow, University of Illinois at Urbana-Champaign
 Shigeki Watanabe, Johns Hopkins University
 Clare Waterman, National Heart, Lung, and Blood Institute/ National Institutes of Health
 David Weisblat, University of California, Berkeley
 Robert Wheeler, University of Maine
 Rachel Whitaker, University of Illinois
 Stephanie White, University of California, Los Angeles
 Theodore White, University of Missouri at Kansas City
 Katrine Whiteson, University of California, Irvine
 Athula Wikramanayake, University of Miami
 Carmen J. Williams
 Rachel Williams
 Amy Willis
 Emma Wilson, University of California, Riverside
 Marc Wolman, University of Wisconsin
 Michael Wright, California State University, Sacramento
 David Wu, University of Chicago
 Ryohei Yasuda
 Deborah Yelon, University of California, San Diego
 Anne Yoder, Duke University
 Rafael Yuste, Columbia University
 M. Jade Zee, Northeastern University
 Robert Zeller, San Diego State University
 Mei Zhen, Lunenfeld-Tanenbaum Research Institute
 Karen Zito, University of California, Davis
 Yi Zuo, University of California, Santa Cruz

*deceased

**former Trustee

EQUAL EMPLOYMENT OPPORTUNITY

The Marine Biological Laboratory does not discriminate in employment or in access to any of its activities or programs or take any retaliatory action on the basis of race, color, religion, sex, gender identity, sexual orientation, pregnancy, status as a parent, national origin, age, disability (physical or mental), family medical history or genetic information, political affiliation, military service, or other non-merit based factors.

In addition, the MBL is committed to the prevention and elimination of sexual harassment, as well as other forms of unlawful harassment, in the workplace. Through training programs and disseminated information, MBL strives to educate its employees, students, faculty, and visitors on these important issues.

Photos

Cover: Blue buckeye butterfly wing scales (Rachel Thayer)
Inside front cover: MBL campus from above (Matt Barton)

P1: Director Nipam Patel

P2: L to R: Adult pygmy zebra octopus (Taylor Sakmar); Regenerated Spinal Cord (Jennifer Morgan); Abhishek Kumar (Anthony Mautino)

P3: L to R: Axolotyl tanks (Dee Sullivan); Hydra (John Szymanski); Filamentous fungus *Ashbya gossypii* (Michael Shribak)

P4: L to R: Elevation in Great Sippewissett Marsh (Kelsey Chenoweth); Toolik Field Station; Burroughs Wellcome Director of Education Linda Hyman

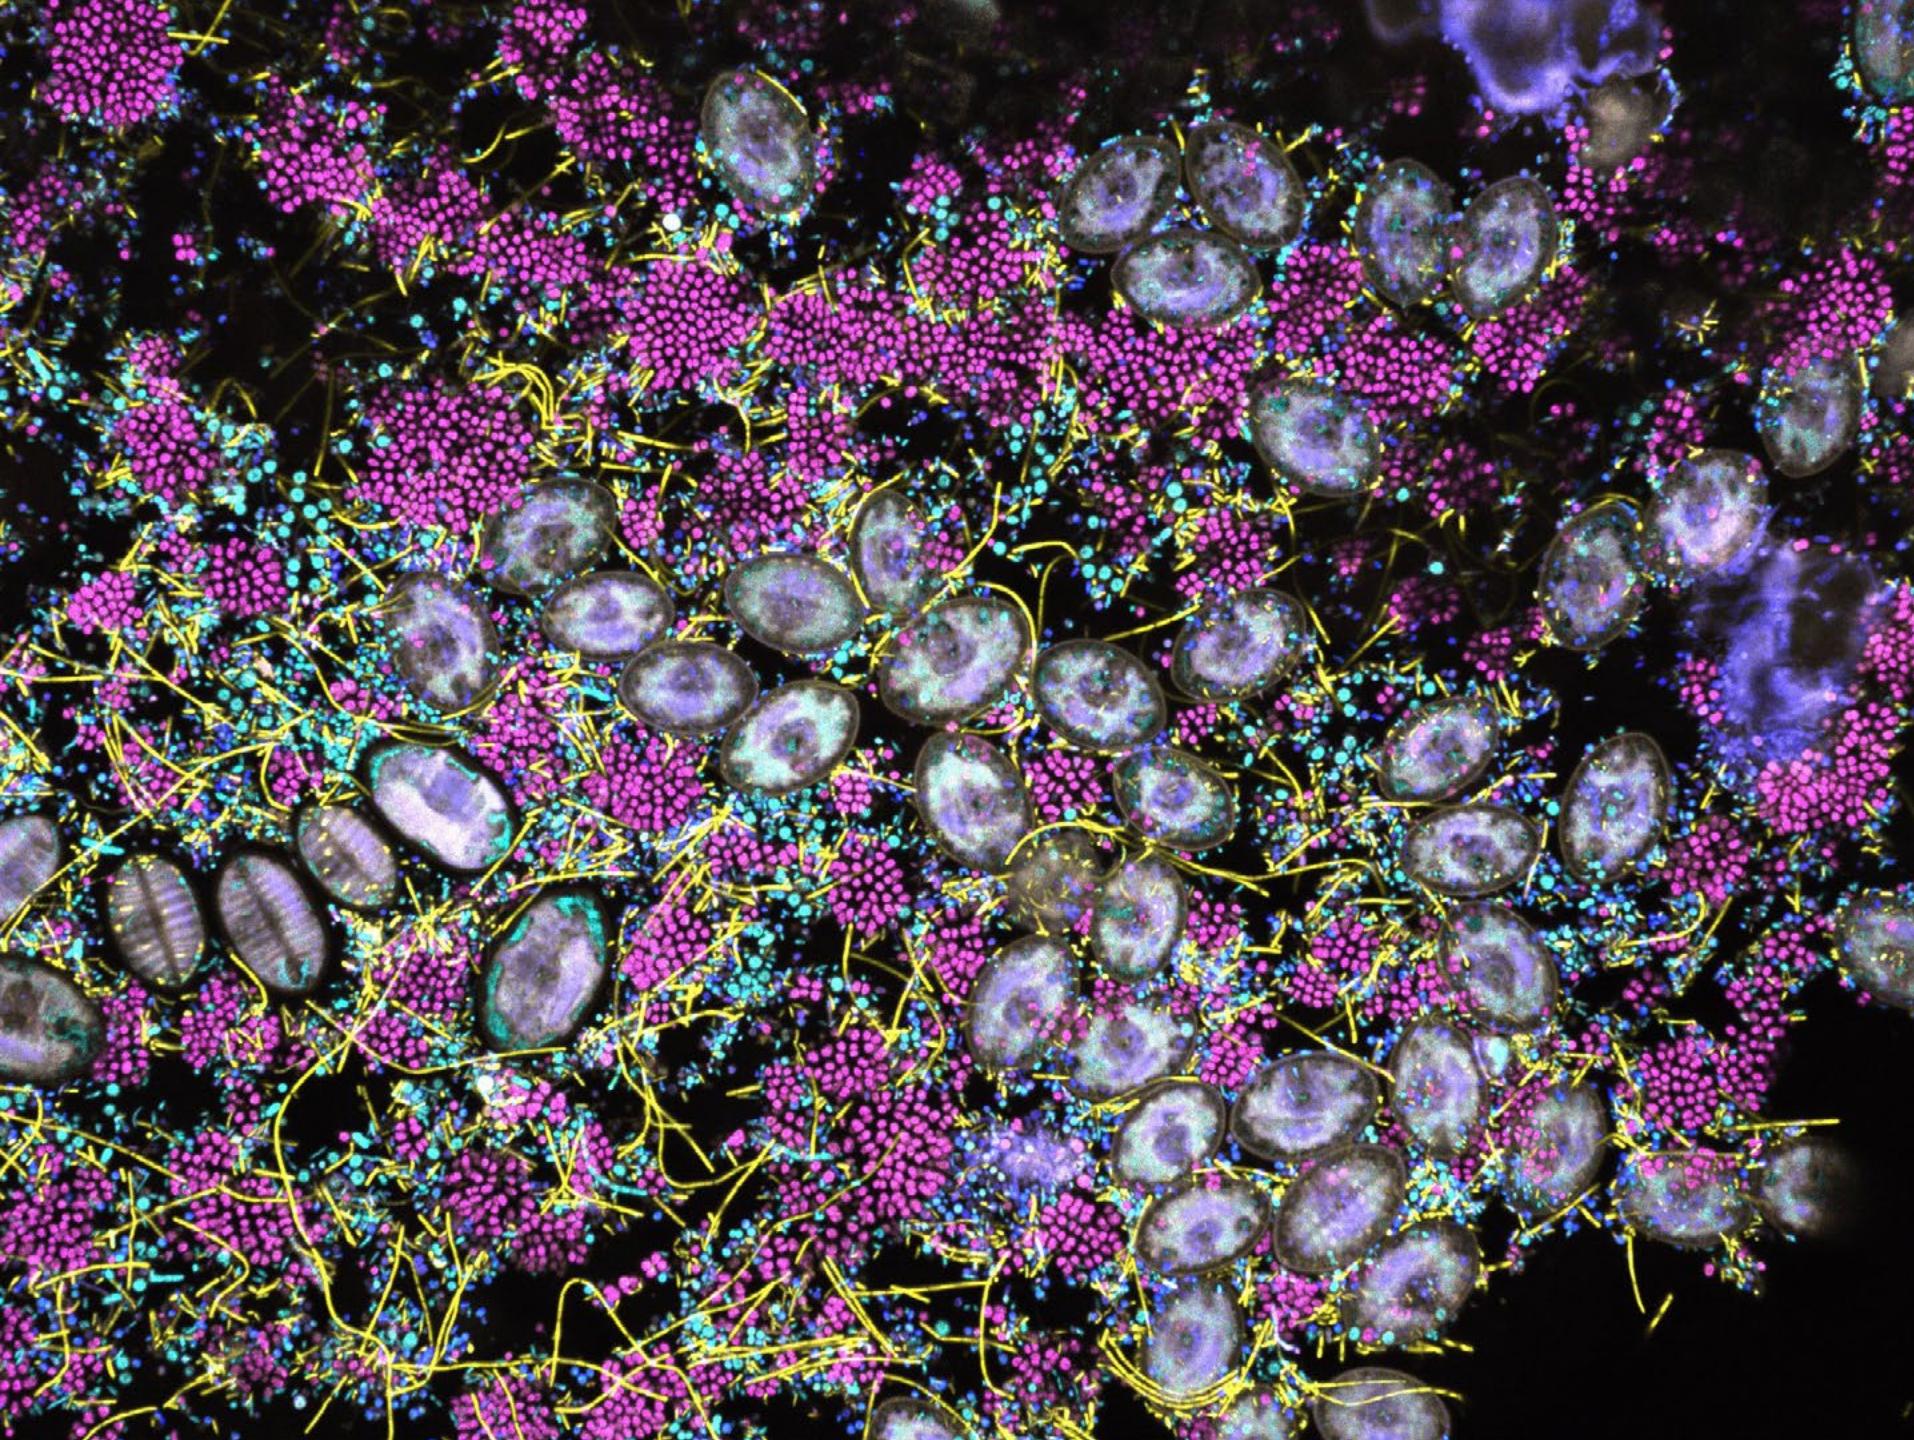

P5: Prince Albert II of Monaco (*Falmouth Enterprise*); Students Rose Coville, Clay Glovier, Yuka Masamura with MBL Senior Scientist Marko Horb (Dee Sullivan); Elevation in Great Sippewissett Marsh (Kelsey Chenoweth)

P7: Students from Glenbard East High School, Illinois and Hockaday School, Texas (Dee Sullivan)

P19: Physiology Course students in Lillie Auditorium (Megan Costello)

P20: Aerial view of Woods Hole and MBL campus (Matt Barton)

P27: Physiology Courses students (Megan Costello)
Inside back cover: Microbes on the surface of kelp (Jessica Mark Welch)
