## WHO IS BID FOR?

Building on the long-standing convening power of the Marine Biological Laboratory, BID (Building Innovation through Diversity) is a new opportunity for postdoctoral fellows or early career faculty from groups traditionally underrepresented in STEM, as well as faculty at Minority Serving Institutions.

The 2023 BID Workshop is a Developmental and Microbiology focused, fully funded 5-day program, engaging early career scientists in ARTC faculty opportunities at the MBL in Woods Hole, MA.

## WHAT IS THE GOAL ?

Taking place **July 8 - 13, 2024**, the aim of BID is to extend the MBL experience to new communities of scientists using engagement with our Advanced Research Training Courses (ARTCs) as a launchpad.

Over the course of five days participants will have an in-depth look at the MBL's unparalleled resources, the potential for fostering new and exciting collaborations, and a comprehensive overview of the ARTCs and opportunities within.

### EXPERIENCE

the Microbiology and Developmental focused advanced research training courses to see how students and faculty embrace “fearless science.”

### DISCOVER

the Central Microscopy Facility and the Marine Resources Center (MRC) to learn about state of the art imaging equipment and non-model organisms

### ENGAGE

in networking activities, the Friday Evening Lecture - part of MBL's storied summer lecture series, and the excitement of Woods Hole where six unique institutions create a “village of scientists.”
